

**Figure 1.** The effect of the concentration of the inhibitor on the rate of polymerization of methyl methacrylate initiated by benzoyl peroxide at 60°C. [MMA] = 0.8 mol/L; [BPO] = 0.001 mol/L; [I] = 0.0001–0.001 mol/L. (●) I = 0.0001 mol/L; (○) I = 0.0002 mol/L; (□) I = 0.0004 mol/L; (△) I = 0.0007 mol/L; (◇) I = 0.001 mol/L.
